// PROFILE

Full Stack Developer with 2+ years of commercial experience delivering production-ready web applications. Specialized in real-time systems, marketplaces, and scalable backend architecture (NestJS + PostgreSQL). Built and deployed 3 live applications with payments, WebSockets, and AI integrations. Previous 6-year career as Head Chef builds extreme stress tolerance and disciplined end-to-end ownership.

VPS NGINX · PM2

TOOLING

Stripe · Gemini AI
Framer Motion Zustand
Jest · Swagger Git

// PROJECTS

MatchDays

2025 – 2026

Personal Project · Seed Round In Progress

- Architected full-stack auction marketplace for sports jersey collectors – real-time bidding via Socket.IO WebSocket gateway with user-scoped rooms, supporting 50+ concurrent connections with sub-100ms bid latency.
- Integrated Google Gemini AI pipeline: auto-generates listing titles, descriptions, authenticity scoring, and price recommendations from uploaded images – reducing listing time by ~70%.
- Implemented Stripe payment infrastructure, Bull job queues with Redis for async processing, scheduled cron jobs for auction closing, and GDPR-aware rate limiting with HMAC-hashed PII keys.
- Modular NestJS architecture – Auth, Users, Auctions, Bids, Notifications, AI modules – with JWT + Passport guards, refresh token rotation, and full Swagger/OpenAPI documentation.

Autosell.pl

2024 – 2025

Client Project · NDA

- Delivered production automotive marketplace end-to-end for a paying client – sole developer from specification through VPS deployment (Docker + NGINX + PM2) within 12 months, handling 100+ live listings.
- Built secure auth layer: JWT, bcrypt, 2FA TOTP (Speakeasy), account lockout, Helmet security headers, and MongoDB sanitization.
- Developed real-time messaging (Socket.IO), image optimization pipeline (Sharp), PDF generation (PDFKit), and multi-channel notifications (Nodemailer, Resend, Twilio SMS).
- Implemented custom admin panel with moderation tools, analytics dashboard, and scoring-based search engine supporting 30+ configurable filters.

autosell.pl github

Personal Project

- Windows XP simulation with custom window manager, boot sequence, and recreated Winamp and Gadu-Gadu apps – demonstrates advanced React state management and complex UI architecture.

// EXPERIENCE

Full Stack Developer (Contract / Freelance)

2023 – Present

Self-Employed · Remote

- Delivered production systems for paying clients with full ownership from architecture to deployment – requirements gathering, iterative feedback loops, and zero-downtime releases.
- Built and deployed Autosell.pl end-to-end: complete lifecycle ownership from specification through architecture to live production on Linux VPS.

Head Chef & Culinary Instructor

2017 – 2023

Zakład Aktywności Zawodowej 'Ja Ty My'

- Managed kitchen operations under high-pressure, time-critical conditions – extreme stress tolerance, decision-making under uncertainty, disciplined end-to-end ownership.
- Instructor and mentor for individuals with disabilities; pursued intensive self-directed programming study throughout, transitioning fully to development in 2023.

// EDUCATION

Independent Study – Full Stack Development

2020 – Present

Skills validated through 3 production applications with real users. No formal CS degree – GitHub repositories and live deployments are the primary proof of competence.
